

DOING THE RIGHT THING

At **Mandarin Oriental, Bodrum**, sustainability is at the heart of our operations. Our approach is rooted in a deep commitment to reducing environmental impact, fostering collaborations for a sustainable future, and continuously improving our practices to align with global standards.

By implementing forward-thinking strategies and honoring the natural beauty that surrounds us, we aim to lead by example in responsible hospitality.

We have eliminated 99% single use plastic in our operations.

We collaborate with non-governmental organizations to help shape a more sustainable future.

We monitor our carbon footprint annually, with a continuous goal of reducing it.

We organize at least five environmental initiatives and activities each year.

We have an internationally recognized LEED Certificate, Blue Flag Award, Green Key Award and GSTC (Global Tourism Sustainable Certificate), Green Check Gold Certificate.

FAIRTRADE

We work with sustainable and fair-trade coffee, cocoa, tea, sugar, egg, and seafood suppliers.

We use eco-labeled chemicals with automatic dosing systems.

We respect and protect the natural habitats of living beings.

We use special systems where the water flow does not exceed 9 liters per minute in showers and 8 liters per minute in taps.

We support preserving local and global biodiversity.

We reuse the wastewater for irrigation, after water treatment. We provide water recovery with rainwater collection points.

We prefer electric all-wheel-drive system cars for our guests' transportation in addition to the resort's existing electric buggies.
